- ERP Software Blog
- Microsoft Dynamics GP Webinars

[Rockton Software](#) is a Microsoft Gold Certified Partner and provides Microsoft Dynamics GP customers and consultants simple, cost effective, valuable add-on tools and enhancements that save time and streamline working in the Dynamics GP environment.

Many users of Microsoft Dynamics GP often use non-intuitive numbering schemes for Customers, Items, Accounts, and other IDs. Ever wish you could do a Google-style search to find your key data in Dynamics GP? Tired of "looking up" a Customer when you know their name and not their ID? SmartFill makes data entry easy!

[SmartFill](#) allows you to type part of the Name, Description, or "whatever" you know into any ID field, and then intuitively discovers the correct ID and types it in for you. No lookup required!

Find accounts by typing in part of their description or just a partial segment. Find Employees by typing in their first or last name, or even their address! Find customers by phone, address, name, or even information stored in outside databases!

To learn more about SmartFill, [click here](#) or [contact Borek](#) for more details.

## Free Giveaway! Year-end Closing Tips

Making sure you properly close a year in Microsoft Dynamics GP is necessary not only to maintain accurate financials, but can impact a number of important business metrics. That's why we are offering our customers a free giveaway, *Closing Dynamics GP Manual*, by Accolade Publications, as our gift to you! The manual provides complete closing procedures for Microsoft Dynamics GP modules GL, AR, AP, SOP, POP, IV and PR and also includes complete explanations of the processes being performed, the proper sequence to perform the closings and when each module should be closed.

Act now before they are gone! [Email us here](#) by **November 26** and we'll send you a free copy!
