Favorite Microsoft Dynamics GP2010 Features (by Role) include:

Finance Manager: Clear Debit/Credit amounts on recurring GL batches; Simplified “Select AP Checks” function; Allow negative Cash Receipts and Recurring cash receipt batches; Track budget changes as transactions; Consolidate budgets into a single budget.

Knowledge Workers: Find/Search routines now contain filters for discontinued or inactive records; Default views for ‘Advanced Lookups’; Homepage tasks have visual cues; New drilldowns from Excel Report Builder reports to GP; Simplified publishing of reports with default settings.

Human Resources Management: Monitor position control and gain access to new budget and position reports; Benefit Enrollment Summary information; New employee attendance, hours and primary pay reports.

Payroll Manager: View/Reprint payroll checks & remittance reports; Ability to start multiple pay runs; Sequence garnishment deductions and set a single max limit; New printing preferences and selection window for payroll posting reports; Simplified PTO management window; Analytical Accounting Integration.

Operations Manager: Print B/O items on pick tickets; Auto-gen lot numbers; Roll down transaction date changes in POP; Speed up receiving and invoicing for returned goods/replenishments; Auto-Receive In-transit items.

Project Accounting Manager: New SRSS reports include Trial balance by Project; Expenses versus retainer, profit & loss by project and more!

All User Changes: Copy user security from one user to another; Sort security windows by access rights; Auto-display of navigation panes; Right-click support for many user actions.

Borek consultants ensure your upgrade process is proven, efficient, complete; and targeted to take advantage of the features you can benefit from immediately.

A Pilot upgrade, “What’s New” training, and “Go Live” Assistance are built-in to our service estimates to be sure your Microsoft Dynamics GP 2010 Upgrade is all-inclusive with almost no downtime for users.

Follow-up surveys are conducted to verify all planned improvements are fulfilled & you receive the payback expected on your investment.
